<b>Resource Person</b>	:	University, Machilipatnam.
<b>Name of Coordinators</b>	:	Mr. S.Govindu
<b>Target Audience</b>	:	B.Tech. I Semester Students
<b>Total no of Participants</b>	:	120

**Objective of the event** : The main objective of this workshop is to enlighten the students about the importance of programming in their career and eliminate the fear of writing programs for any given problem.

**Outcome of event** :

On completion of this workshop, student can able to:

1. Know the importance of Programming.
2. Solve different real time problems using programming.
3. Create different applications using programming.

### **Description / Report on Event:**

Developing a program involves a series of steps. The programmer defines a problem, plans a solution, codes the program, tests the program and, finally, documents the program. Usually, the programmer defines what he knows and the objective, selects a program to use, debugs the program in stages after completion to ensure no errors are introduced and then documents the design, development and testing of the program. With the ever-changing face of computer technology, programming is an exciting and always challenging environment that few programmers ever dream of leaving.

In this workshop, we have mainly covered different aspects related to programming and made the students to write programs on their own with ease.

### **Feedback / Suggestions :**

1. I got to know about the importance of programming.
2. I got some shortcuts for writing programs for some real time problems.
