Inauguration of Two day workshop on "PC GAME DEVELOPMENT"

The resource person Mr. K. Surya Prakash said despite the presence of mobile phones, tablets consoles and several other gadgets, PC and desktop games are still popular choices for gamers all across the world. Juego Studios develops fun and exciting 2D & 3D games for desktops and PCs.

Addressing by Mr.K.Surya Prakash, Misplaced Minds

Some of the advantages of PC Game Development

1. PC games, unlike gaming consoles, offer an opportunity for hundreds of players to play one game simultaneously. The amount of enthusiasm or excitement such games provide, cannot really be expressed in words. This definitely contributes to the huge demand for PC Games.
2. The connection options are many. You can connect over your local network and play the PC game with people who are connected to the same network. You can even connect using an internet connection and play with many players across the world. This improves the addiction value of the game.
3. PC Games offer better audio and graphics. You can use a big HD monitor or you can connect your PC to your TV screen for great graphics. You can use excellent speakers for better audio and enjoy the game thoroughly.
4. This platform offers absolutely no limitations when it comes to the number of games or type of games.

Most PC games are free-to-play games. You can play a lot of multiplayer PC games on the net absolutely free. You can also find websites that offer multiplayer demos for free
